

Universal USB Charger INSTALLATION INSTRUCTIONS Part# 90-005

TOOLS NEEDED

- Rotary Cutting Tool
- Phillips Screwdriver
- Marker
- Wire Stripper/Crimper

PARTS LIST

- USB Charger
- Charger Cover
- Ring Nut
- Charger Bezel
- Screws (2)
- Female Spade connectors (2)

STEP 1

Switch key to the OFF position and engage the Parking brake.

Place TOW/RUN switch under seat to TOW position.

STEP 2

Find desired location for your USB Charger, ensure location is free on the backside from obstructions for installation.

STEP 3

Using the ring nut from charger as a template for your cutout, mark the inside of the ring with a marker.

Cutting to the inside of marked line, use a cutting tool to cut out the charger hole.

STEP 4

Slide charger cover onto charger. Slide charger bezel onto charger. Insert USB into cutout.

Secure with Ring Nut and supplied screws.

STEP 5

Locate 12V on your battery pack with a multimeter. Cut the necessary wire length to run from 12V power to charger.

Attach the positive and negative 12V to the corresponding positive and negative symbols on the back of the charger using the supplied female spade terminals.
